EDUCATION

Wilfrid Laurier University

Bachelor of Science in Computer Science

Milton, ON

Expected May 2028

- **Courses:** Data Structures and Algorithms I & II, Discrete Math, OOP, Microprocessors, Linear Algebra
- **Leadership & clubs:** Director of Technology at BeLaurier

EXPERIENCE

BookMyHelp

Full-stack Developer Intern

Mississauga, ON

September 2026 – Present

- Developing and maintaining backend communication workflows for BookMyHelp's service marketplace using Java, Spring Boot, PostgreSQL, Redis, Thymeleaf, and REST APIs across booking, SMS, email, and notification systems.
- Improving SMS reliability and delivery efficiency by redesigning booking notifications with input sanitization, message-length controls, GSM-friendly character normalization, locale-safe formatting, and defensive handling for malformed or missing customer data.
- Improving transactional email infrastructure by fixing packaged-JAR resource loading, implementing inline CID image delivery, and replacing duplicated email markup with reusable Thymeleaf components across signup and rescheduling workflows.

CKSS Robotics Club

Robotics Team Member

Milton, ON

October 2022 – July 2023

- Contributed to a **1st-place finish at the Ontario Regional FIRST Robotics Competition** by collaborating with a 20-member team to design, program, build, and test a competition-ready robot.
- Improved robot reliability and competition readiness by diagnosing and resolving **30+ mechanical, electrical, and programming issues** while coordinating fixes across design, build, and testing efforts.
- Accelerated design iteration under competition deadlines by testing prototypes, identifying performance issues, and working with teammates to refine robot systems based on real-time testing feedback.

PROJECTS

Ts-Rx: Self-Healing Dashboard for Tailscale Networks | Python, FastAPI, React

HackCanada 2026

- Built an AI-powered incident response dashboard that monitors self-hosted Tailscale services, analyzes Datadog telemetry, and generates root-cause diagnoses and recovery guidance using Gemini.
- Reduced troubleshooting friction by integrating live diagnoses and recovery steps directly into the Tailscale interface through a custom React dashboard backed by FastAPI.

a11y.sense: AI Accessibility QA Sandbox | Next.js, React, Three.js, Gemini AI

GenAIGenesis 2026

- Built an AI accessibility testing platform that combines Playwright browser automation with Gemini analysis to identify WCAG issues across page structure, screenshots, and interactive elements.
- Improved accessibility debugging by building a Three.js visualization that maps WCAG violations to affected disability groups and connects findings to their location and severity on the page.

Neural Network From Scratch | Python, NumPy

Personal Project

- Improved training performance by implementing SGD and Adam optimizers from scratch and comparing their convergence behavior across the same classification task.
- Increased classification accuracy from **65% to 97%** by refining optimization and training behavior on a three-class dataset.

TECHNICAL SKILLS

Languages / Frameworks: C, C++, Python, Java, JavaScript, TypeScript, HTML, CSS, SQL, React, Next.js, Node.js, Spring Boot, FastAPI, PyTorch, JUnit 5

Tools / Technologies: PostgreSQL, MongoDB, Redis, AWS, AWS SNS, Docker, Git, Linux, Maven, npm, Datadog, REST APIs, JWT, System Design, Machine Learning
